

DURA FORCE PRO 2

by  KYOCERA

DURAFORCE PRO 2 AS A MOBILE HOTSPOT

The mobile Hotspot capability on your Kyocera DuraForce PRO 2 certified FirstNet Ready™ phone allows you to turn your phone into a sharable Wi-Fi hotspot. This feature works best when used in conjunction with 4G LTE data services.

NOTE: To use this feature, you must be subscribed to an eligible phone plan that has Mobile Hotspot, or a plan that does not have Mobile Hotspot blocked.

TO SET UP THE HOTSPOT FEATURE ON YOUR DURAFORCE PRO 2:

1. From the Home screen, tap **[Apps]** > **[Settings]** > **[Network & internet]** > **[Tethering & Mobile Hotspot]** > **[Mobile Hotspot]**
2. Tap the **[OFF]** icon under Mobile Hotspot to turn the hotspot capability on, if not already enabled
3. Tap the **[OFF]** icon next to Broadcast network name to turn on and make hotspot visible for sharing
4. Share the Hotspot password with your group
5. Confirm the Hotspot active icon (📶) appears at the top of the status bar
6. To see how many devices are connected, go to **[Settings]** > **[Network & internet]** > **[Tethering & Mobile Hotspot]** > **[Mobile Hotspot]**

PREVENT HOTSPOT FROM TURNING OFF DUE TO INACTIVITY, OR TO USE QUICK SETTINGS TO QUICKLY TURN HOTSPOT ON/OFF:

1. If you plan on using the hotspot for an extended period and don't want it to turn off automatically after periods of inactivity: Tap **[Advanced]** > **[Mobile Hotspot turn off timer]** and tap **[Always stays on]**
2. Alternatively, use the quick setting to turn Hotspot ON/OFF as needed and allow it to turn off after inactivity to save battery power

PERSONALIZING YOUR HOTSPOT FEATURE (OPTIONAL):

1. To edit your Hotspot name (SSID – Service Set Identifier) tap **[Hotspot name]** enter a new name and tap **[OK]** to save
2. To change the password, tap **[Hotspot password]**, enter a new password and tap **[OK]** to save

For best results, keep the display off and connected to the AC adapter that came with your device.
