<sup>1</sup> Certified waterproof for up to 6.5 feet (2 meters) for 30 minutes. Before immersing your phone in water, make sure all ports and covers are properly sealed, with no foreign objects obstructing the seals, to maintain the waterproof capability. The phone should never be used under water with a broken or open SIM/microSD slot cover (located under battery cover). If your phone gets wet:

• Water in the phone's open microphone and speaker ports may affect outbound audio quality and speaker performance. These are temporary conditions and will subside once the phone is dry.  
• Dry your phone with a clean cloth before charging.

<sup>2</sup> Recognizes touch input while wearing gloves up to 3mm thick; the material, texture and thickness of the glove as well as how it fits your hand will impact performance. Individual results may vary.

<sup>3</sup> Additional fees may apply.

<sup>4</sup> Talk and standby performance may vary based on user settings, feature use, and network.
